Configuration - Type-C

- USB Type-C is a common connector these days.
- USB Type-C can be configured with different functions, some of them are:
 - Power
 - Data Transfer
 - Video Signal Alt Mode HDMI
 - Video Signal Alt Mode DP (DisplayPort)
- In order for the faytech flat to work properly, the Type-C port should deliver:
 - Power
 - Data
 - Video Alt Mode DP
- The signal received depends on the source device!

Configuration - Type-C configuration scenarios

1. Type-C – Power only
 - faytech flat only receives power, not usable as display or touch display
2. Type-C – Power + Video Alt Mode DP
 - faytech flat can be used as a monitor (w/o touch function)
 - *Example: MacBook*
3. Type-C – Power + Video Alt Mode DP + Data
 - faytech flat can be used as a monitor or touch monitor
 - *Examples: Android, Windows or Linux devices*

With some devices the Type-C power line may not deliver enough power. In this case an additional power supply must be connected to the 2nd Type-C connector
